## **Techttextil and Texprocess 2019: registration now open**

**From 14 to 17 May 2019, Techttextil and Texprocess will present the complete spectrum of technical textiles, nonwovens and textile processing technology in Frankfurt am Main.**

Under the motto 'Space for Innovation', Techttextil, Leading International Trade Fair for Technical Textiles and Nonwovens, will present the complete spectrum of technical textiles, functional apparel textiles and textile technologies and their applications from 14 to 17 May 2019.

'Space for Progress' is the motto of the concurrent Texprocess that, as the Leading International Trade Fair for Processing Textile and Flexible Materials, will show the latest machines, plant, processes and services for making up textile and flexible materials. Companies can now register to exhibit at both events.

"Innovation and progress. With these two keywords, we are launching next year's Techttextil and Texprocess where we will bring together textile manufacturers, users and processes who are always in advance of their time and who offer and use textile solutions that transcend sector boundaries", says Olaf Schmidt, Vice President Textiles and Textile Technologies, Messe Frankfurt.

## **Textile intelligence at Techttextil**

Functional and smart textiles for garments, the automobile industry, sport, medicine and hazard protection are one of the focal points of the coming Techttextil. Additionally, a comprehensive complementary programme of lectures, discussions, awards and other events will offer supplementary insights into the latest developments in the sector.

## **Digital connectivity a main theme at Texprocess**

Digitalisation as a driving force of innovation in the textile industry will be one of the main themes at Texprocess. Following the success of the last event, a digital textile micro-factory will once again show a fully networked textile production chain in live operation. New: in addition to a production chain for garments, trade visitors will also be able to see the complete process for textiles for other areas of application, such as the automobile industry.

Ludwig-Erhard-Anlage 1  
60327 Frankfurt am Main

### **Special show: 'Urban Living – City of the Future'**

A magnet for visitors of both fairs will be the 'Urban Living – City of the Future' special show. Cities are the living space of the future. Half of the world's population already lives in cities. By 2050, almost 70 % of all people will dwell in metropolises and megacities. Thought leaders, trend experts and textile specialists have given consideration to which interfaces between technology and textiles will grow together in the interests of urban quality of life and where technical textiles will have a particular influence on architecture, clothing, mobility and civilisation in the future.

1,789 exhibitors from 66 countries were represented at the last edition of Techtextil and Texprocess in May 2017. Over 47,500 visitors from 114 countries made their way to Frankfurt Fair to find out about the most innovative products in the field of technical textiles and the latest processing technologies.

### **Background information on Messe Frankfurt**

Messe Frankfurt is the world's largest trade fair, congress and event organiser with its own exhibition grounds. With more than 2,500\* employees at some 30 locations, the company generates annual sales of around €661\* million. Thanks to its far-reaching ties with the relevant sectors and to its international sales network, the Group looks after the business interests of its customers effectively. A comprehensive range of services – both onsite and online – ensures that customers worldwide enjoy consistently high quality and flexibility when planning, organising and running their events. The wide range of services includes renting exhibition grounds, trade fair construction and marketing, personnel and food services. With its headquarters in Frankfurt am Main, the company is owned by the City of Frankfurt (60 percent) and the State of Hesse (40 percent). \* preliminary numbers 2017
