Save Energy in Textile SMEs (SET)

The **SET** project is launched to deliver real added-value solutions for the European textile SMEs. **SET** teams will assist at least 150 textile companies in assessing the energy saving potential.

Upcoming legal obligations, financial incentives and technologies will also be addressed.

Two hours on Energy Efficiency

It takes as little as two hours to learn how textile companies can benefit from energy efficiency.

Joining events or meeting with **SET** teams in one of 10 countries, managers will get information and assistance to seize their company's energy efficiency potential.

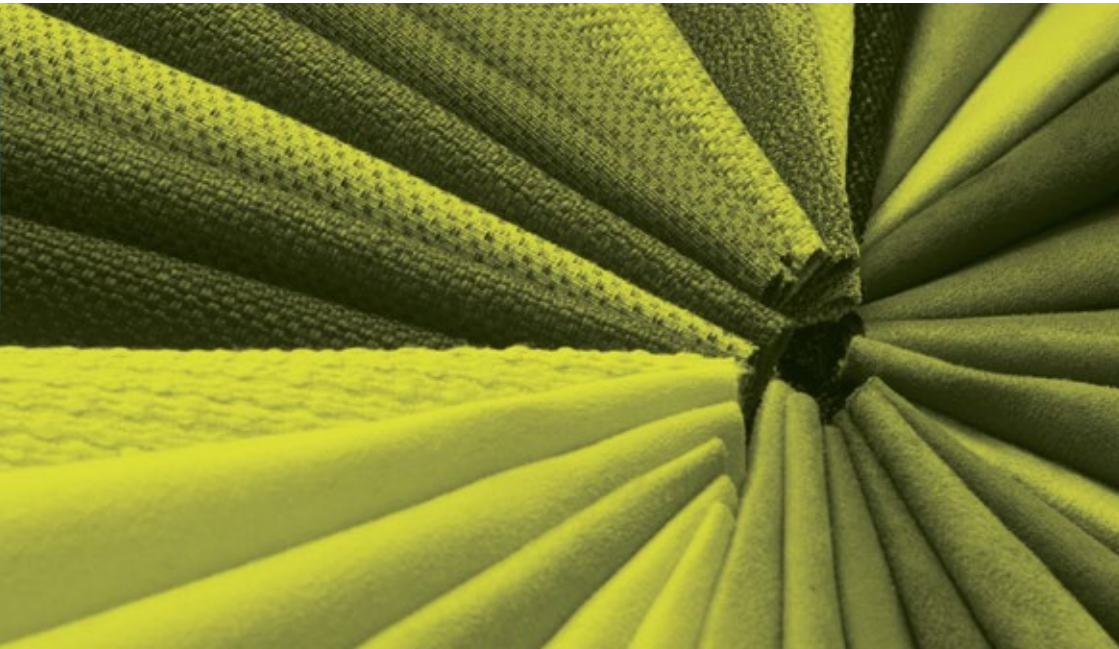

**Events planning is published in
www.euratex.eu/set as of second half 2015**

SET for companies

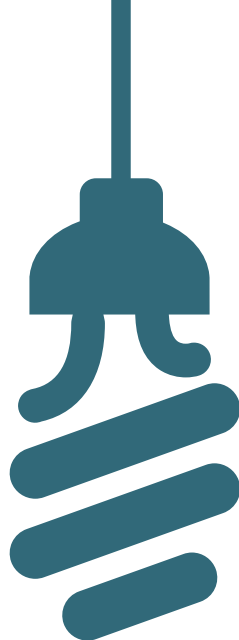

- **A self-assessment tool**
- **Overview on legal obligations**
- **Insights into financial incentives**
- **Bilateral support & training events**

Who we are?

Nine partners with proven track record of success in textile research, energy efficiency, energy audits and support to textile & clothing manufacturers.

The partners use their complementary competences and business networks to boost energy efficiency.

SET is primarily implemented in Portugal, Italy, Belgium, Germany, Czech Republic, Hungary and Romania. **SET** is open to team up with new organisations and deliver results to more companies all over Europe.

Energy Made-to-Measure campaign

SET is a part of the Energy Made-to-Measure campaign which empowers until 2016 over 300 textile & clothing companies, notably SMEs, to become more energy efficient.
